### **DETAILED ACTION**

1. Claims 1-21 are presented for examination.

3. Inventions I, II, and III are related as subcombination disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The following case instant:

Invention I, discloses server communication including a voice over routine to create at least part of executable program code.

Invention II, discloses connection establishment among networks and network devices.

Inventions III, discloses demand based messaging in a network communication.
